

A Professional Society Event (3 Days), SEVALAYA – 2025

Faculty of Education delighted to present the report of the three-day 'A Professional Society Event', from 22nd July to 24th July 2025. The event was held at SEVALAYA, Thiruninravur, an organization dedicated to serving underprivileged communities and transforming their lives through education, healthcare, and social upliftment.

On the first day, the students and faculties were introduced to Sevalaya's mission and services through an informative video presentation. The video showcased Sevalaya's remarkable efforts, including the operation of free schools, orphanages, old age homes, goshalas, libraries, and other facilities that aim to empower and uplift the less privileged. Following this, student-teachers from the Faculty of Education were allotted to take classes for children at different levels as per the pedagogical structure of the B.Ed. curriculum.

The second day included another round of teaching sessions, followed by a comprehensive campus tour organized by Sevalaya. During the visit, the participants had the opportunity to witness the vibrant and service-oriented atmosphere of Sevalaya. We visited the community college, which provides vocational courses such as beautician training, mechanics and bakery courses for underprivileged and less privileged individuals. The team also explored a free hospital, a physiotherapy hospital, and a free pharmacy that offers medical support to the residents of Sevalaya as well as the surrounding villages. The student-teacher educators also visited the old age home within the Sevalaya campus, where they interacted with the senior citizens, spent meaningful time with them, and witnessed the compassionate care being provided to support their well-being. These facilities stood as a testament to Sevalaya's commitment to holistic development and care for the community.

On the third and final day, B.Ed. student-teachers continued to take classes and engaged the children with dedication and enthusiasm. A special highlight of the day was the sapling donation and plantation activity, supported by the Rotaract Club of Mogapair which were planted by our students across the Sevalaya campus. This green initiative added a meaningful environmental dimension to the program and symbolized growth and sustainability.

The event significantly enhanced the student's sense of social responsibility, providing them with real-life exposure to community service and empathetic engagement.
