

## Subject Lecture on Test and Measurement

The Faculty of Education is delighted to present the report on the subject lecture, "Test and Measurement," delivered by Ms. J. Vigneshwari, Assistant Professor, on February 3, 2025, at 11:00 a.m. in K101-Smart Room, Phase II Campus. The session aimed to explain the various measurements and analysis used to evaluate the learner's knowledge, skills and competencies. She explained the measures of central tendency (mean, median, mode) summarize a dataset's center, while measures of variability (range, variance, standard deviation, IQR) describe its spread. She also highlighted that testing and measurement are essential in education for evaluating learners' knowledge, identifying strengths and weaknesses, and guiding future instruction.
