## **MEME SHARING**

*In our modern world, internet and social media use has become an essential part of our daily lives. And memes can be considered as the full that social media runs on, without it, social media severe no fun. They are the back bone of it. Memes involve sever types of it, it can be dark, deep, reaction-based , political statements turned funny,and many more.*

### **SHAREABILITY**

*As humans, we are social beings. We instinctively want to share our emotions and relate with others out and gain attention in our society and culture.Memes allow us to do all that. This makes them an easy and fast way of sharing information.Simply enjoying the joke. We all feel the same emotions, tensions, and stress in such situations, making our feeling mutual.*

*When a stressor is converted into a funny meme, most people can relate to it, talk about it, and feel that they are not alone in that situation. This make the stressor less painful situations and that can help you to feel better because of the support and understanding you receive from your trusted circle. They help deal with heavy issues*

*And memes makes easier to understand emotion.our parents often wonder why we can't just talk instead of sharing memes. Sometimes it's just easier to show some a picture a say,"This is how I felt today ".They might understand ,they might say they feel the same way.what's more comforting than that?*

*Memes make us to see the humorous side of a stressful situation, help in global communication and cultural exchange ,and lead to collective coping and sharing a meme is sharing our emotion and some information too.*

**-GAYATHRI.E III E**

## **YOUTUBE CHANNEL & SUBSCRIPTIONS**

A you tube channel is something any person can make now-a-days. It has become a common part in the world of internet. Along with the increase in the number of viewers, the rise in the number of you tube channels are rapidly increasing. There are many small budget channels facing difficulty, struggling for view and subscriptions including my mom's channels, Noxy's notes and palaharam. Me the prime and only handler, editor, camera women, manager, find it very demotivating when our contacts do not get what it deserves. Both my mom's channels are about cooking and so I got to know about her passion about cooking hacks together has become very common many of the times getting views are much easier than getting subscribers. Being a young you tube channel, Patience and motivation is must to succeed. It may take a few years but will surely be a better version with a decent number of subscribers, I would like to conclude saying subscribers for more

-RIZWIN FATHIMAI E

## **Memes Shaping culture**

Memes are everywhere nowadays You're scrolling, your feed, and they pop out all the time. They make you laugh a bit if you can relate to them, and you may even send some to your friends every thought about how this can shape your life? Do memes inference our thinking our language? Our beliefs! Are they modifying our communication skills? Do they shape our society? Our culture ,They do. In my opinion, the meme culture has rooted in popular culture in such a way that the masses can, as a matter of fact, be shaped by it, memes change one perception of reality

The audience is easily manipulated by meme maker, whoever they are, being that their ray of influence does not depend on there level of relevance in society.

Virally transmitted remixed images with words that poke fun at cultural or social norms and that can change meaning multiple times through further sharing and remixing. Within a culture, memes can take a variety of forms, such as an idea, a skill, a behavior ,a phase, or a The particular fashion and replication and transmission of a meme occurs when one person copies a unit of cultural information comprising a meme from another person.

Memes are often built upon pop culture and current affair, which means they play a large part in teams of social commentary.
