

MGR ASSOCIATION FOR GREAT INNOVATIVE CREATORS

Department of Civil Engineering

Event Title	Professional Society Event on Drawing Competition in Association with IGBC		
Objective of Event	The major objective behind launching such a project is to ensure energy security for the country.		
Chief Guest /Speaker Details	Nil, Nil, Nil		
Date	22/09/2023	Time	10.00 AM to 12.00PM
Venue	Civil Smart Room	No. of Participants	100

REPORT

TITLE

Professional Society Event on Drawing Competition in Association with IGBC

CONTENT

The government aims to harness excess renewable energy from some states and synchronise the same so that the unused extra energy can be transmitted to energy-starved regions. Energy efficiency simply means using less energy to perform the same task – that is, eliminating energy waste. Energy efficiency brings a variety of benefits: reducing greenhouse gas emissions, reducing demand for energy imports, and lowering our costs on a household and economy-wide level. Often an energy objective is influenced by legal requirements or financial, operational or business conditions. An example of an objective is “Reduce energy consumption by 10% over the next five years”. Supporting rural development: Renewable energy technologies can support rural development by providing access to energy to rural communities, which can help to improve quality of life, increase agricultural productivity and stimulate economic growth. 7 members participate in drawing competition. India stands 4th globally in Renewable Energy Installed Capacity (including Large Hydro) Professional Society Event on Drawing Competition in Association with IGBC
