Department of Civil Engineering organized a workshop on QUANTITY SURVEYING AND BUILDING ESTIMATION on 26/07/23 in our department smart room at 10.00 to 1.00 p.m. to the Third year and Final year students of B.Tech Civil Engineering . Dr. Kavitha HoD welcomed the gathering and the Guest : KAKA MOHAMMED SUHAIB , MANAGING DIRECTOR, SAMSCO CONSTRUCTION of the event . The workshop started with general concepts in construction methodology and pinned on estimation of a residential building with different floor levels. Finally the billing of quantities (BOQ) was discussed in current site conditions. Dr. V.Manjula proposed a formal vote of thanks. We thank our Honorable President sir for his constant support and encouragement in all our activities. We express our sincere thanks to all executives of our university for their support and motivation

Three-point estimating is a method of estimating a task or project by considering three different estimates:

The most optimistic estimate.

The most pessimistic estimate.

The most likely estimate.
